

AGAT Laboratories 

Timmins Laboratory

Timmins Sample Preparation

With the support of our existing Timmins facility, AGAT has now the potential to streamline the prep process and expedite samples destined for our Mining Geochemistry laboratories in Mississauga and Thunder Bay. The new Timmins facility consolidates our ability to deliver these specialized geochemistry packages with industry-leading turnaround times, rigorous data quality standards and the exceptional service that has been the touchstone of AGAT's philosophy throughout its 40-year-long history.

AGAT Laboratories recognizes how critical quality control is to the overall success of a project. Our Quality Control department utilizes an integrated Laboratory Information Management System (LIMS) that monitors every step of the laboratory process and our Quality Management System is officially recognized to meet international standards ISO 17025:2017. Certified reference and standard samples, sample duplicates and blind duplicates are routinely utilized in our laboratory stream to quality check sample preparation, sample quality, instrument precision, and data accuracy.

Accreditation

AGAT Laboratories Timmins location is accredited or approved for specific analyses by the following agencies:

- The Standards Council of Canada (SCC).
- The Canadian Association for Laboratory Accreditation (CALA).

Our Timmins facility is equipped to handle, drying, crushing and pulverizing. These samples include:

1. Core
2. Half Core
3. RC
4. Outcrops
