

AGAT Laboratories 

Whitehorse Laboratory

Whitehorse Sample Preparation

AGAT Laboratories' mining testing facility in Whitehorse was built to service the mining exploration sectors of Western Canada. This laboratory has been designed to meet the growing demands for the prospecting, exploration and production needs. Plus, expanding AGAT's commercial geochemistry laboratory link in Canada.

AGAT Laboratories recognizes how critical quality control is to the overall success of a project. Our Quality Control department utilizes an integrated Laboratory Information Management System (LIMS) that monitors every step of the laboratory process and our Quality Management System is officially recognized to meet international standards ISO 17025:2017. Certified reference and standard samples, sample duplicates and blind duplicates are routinely utilized in our laboratory stream to quality check sample preparation, sample quality, instrument precision, and data accuracy.

Accreditation

AGAT Laboratories Whitehorse location is accredited or approved for specific analyses by the following agencies by the Standards Council of Canada (SCC).
